		Application No.	Applicant(s)						
Office Action Summary		10/659,881	WAZANA ET AL.						
		Examiner	Art Unit	,					
	•	M. Alexandra Elve	1725						
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
1)	Responsive to communication(s) filed or	1 .							
		This action is non-final.							
·—	☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is								
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.								
Disposition of Claims									
5)□ 6)⊠ 7)□	4) Claim(s) 1-14 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-14 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement.								
Application Papers									
9) ☐ The specification is objected to by the Examiner. 10) ☑ The drawing(s) filed on 11 September 2003 is/are: a) ☑ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.									
Priority u	ınder 35 U.S.C. § 119								
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.									
Attachmen									
2) Notic 3) Inform	e of References Cited (PTO-892) e of Draftsperson's Patent Drawing Review (PTO-9 nation Disclosure Statement(s) (PTO-1449 or PTO r No(s)/Mail Date 1/19/05, 6/28/04.	48) Pap	rview Summary (PTO-413) er No(s)/Mail Date ice of Informal Patent Application (PToer:	O-152)					

Art Unit: 1725

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it is two paragraphs. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4, 6 & 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Araki (USPN 6,223,010) in view of Piccioli et al. (USPN 4,549,066).

Araki discloses a resin product with the method and apparatus used for disassemble. The cartridge is cut with a laser.

Araki does not teach the use of a gimbal (that rotation of the part).

Piccioli et al. discloses the cutting of a molded polyester resin product using a laser. The polyester resin product is rotated while the laser cuts the excess product off.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use a rotation device, as taught by Piccioli et al. in the Araki system because of the enhanced ease of product handling during the disassembly process.

Art Unit: 1725

Claims 7 & 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Araki in view of Koike et al. (USPN 6,864,294).

Araki discloses a resin product with the method and apparatus used for disassemble. The cartridge is cut with a laser.

Araki does not teach the type of resin material used.

Koike et al. discloses the recycling of a resin product. The prime example is a thermoplastic ink jet cartridge. The recycled material is typically a thermoplastic ABS resin (acrylonitrile butadiene styrene resin), which is a so-called styrene based polymer.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use ABS, as taught by Koike et al. in the Araki system because this is merely a type of resinous material that is traditionally used in cartridges.

The prior art discloses a product substantially similar to a claimed product, differing only in the manner by which it is produced. It has been held that one of ordinary skill in the art at the time of the invention would have considered the claimed product because of the similarities in appearance, properties and function. The burden falls to the applicant to show that any process steps associated with the claimed product results in a materially different product from those of the prior art, because there is nothing in the record before the examiner to reasonably conclude that applicant's product differs in kind from those obtained by the references. See In re Brown 173 USPQ 685 and In re Fessman 180 USPQ 324.

Art Unit: 1725

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Araki and Piccioli et al., as stated above and further in view of Koike et al.

Araki and Piccioli et al. disclose a cartridge but not the type of material used.

Koike et al. discloses the recycling of a resin product. The prime example is a thermoplastic ink jet cartridge. The recycled material is typically a thermoplastic ABS resin (acrylonitrile butadiene styrene resin), which is a so-called styrene based polymer.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use ABS, as taught by Koike et al. in the Araki and Piccioli et al. system because this is merely a type of material that is traditionally used in cartridges.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Araki and Koike et al., as stated above and further in view of Baley (USPN 5,676,794).

Araki and Koike et al. do not teach the cutting route.

Baley discloses the cutting of a toner cartridge for remanufacturing. The figures show that the disassembly is around the rectangular plate that is essentially a circuitous route.

It would have been obvious to one of ordinary skill in the art at the time of the invention to use a circuitous route, as taught by Baley in the Araki and Koike et al. system because this is merely tracing the usually path which is used to disassemble the toner cartridges.

Application/Control Number: 10/659,881 Page 5

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Alexandra Elve whose telephone number is 571-272-1173. The examiner can normally be reached on 6:30-3:00 Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on 571-272-1171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

August 6, 2005.

M. Alexándra Elve

Primary Examiner 1725
